Transcript <u>Hide</u>

This is an example of how the transcript will be presented. If the user chooses to show the transcript, the transcript will highlight the words to follow along with the video.

‹

1 This local menu will overlay the global menu. It will be collapsed and expanded by selecting the left caret at the bottom.

To familiarize the user with this local menu, it will be expanded by default and will have a distinct color. This way, once it's collapsed, users will be able to recognize it.

2 Progress bar for the overall course.

Checkmarks to indicate complete sub-topics.

3 Dropdown of individual file downloads, or an option for all files in the respective sub-topic.

4 Users will use this checkbox once they've completed a sub-topic.

Selecting "Next" does not automatically mark a section as completed. This lets users browse the course and its content without a sub-topic being marked as completed by default.
